Hi Becky and Glenn,

The Sonoma Inspection reports are being completed and emailed to you now, one at a time due to size of the reports, photos, dairy maps, satellite images, topographic maps, and FEMA flood maps in the cases where near the 100 year floodplain. Thank you for your patience in waiting for these.

Sincerely,

Cherie Blatt

Subject: RE: North Coast Inspection Report Information

Hi Cherie,

We need to finalize our "EPA" inspection reports, and I need to confirm some facility specific information regarding the sites we visited. I think it would be easiest to do this with a conference call as opposed to writing an email with all my questions.

One data element that I would like to confirm is the number of acres that the facilities are using for manure applications. As an example, for the Moody Dairy, I recorded the facility was only actively land applying to part of their total acreage (1,600 acres), and that the facility has a total of 750 cows (380 cows milking + dry; 300 other). The inventory numbers don't match up with the information that I have pre-inspection (365 milking + dry) so I wanted to compare my notes with what you had recorded during the inspection in case my notes were incorrect.

Also, can you share the photos as we agreed to use yours (and not take our own)? I can set up a "protected" SharePoint site, unless there is an easier way to share them?

Please let me know if you can do a conference call this week, and whether I should set up a SharePoint site for photo sharing.

Thanks,
Becky Mitschele

Hi Glen and Becky,
Yes, I am working hard to finish all the reports, have them reviewed by my supervisors, finalize by our admin staff, and send to you. You are on the cc: list for all final reports that you attended.
Thanks!
Cherie

Subject: North Coast Inspection Report Information

Hi Cherie,

My calendar indicates the 2 month mark to receive your facility report information on the 10 CAFOs we visited. Becky and I eagerly await your information. Thank you in advance for your timely response. Headquarters and our own management are on our heels to complete our reports (which Becky has ready, minus the details from your field inspection reports with photos and captions).

At this point, even if you don't have your completed final reports, we could use the summaries of your violations observations along with the basic inventory info, including Lat/Longs and photos (w/captions). Thank you!

Glenn
